ISO-METRIC VIEWS

Karthik M S
Assistant Professor
Dept. of Mechanical Engineering
SJCE, JSS S&TU Mysore.

ISO-METRIC VIEWS

[PROBLEMS]

[1] A regular pentagonal prism of base edge 30mm and axis 60mm is mounted centrally over a cylindrical block of 80mm diameter and 25 mm thick. Draw isometric view of the combined solids. [Sketch book problem]

[2] A cone of base diameter 40mm and height 50mm rests centrally over a frustum of a pentagonal pyramid of base side 45mm and top side 35mm and height 55mm. draw isometric view of the solids.

Prof. Karthik M S @ SJCE, JSSSTU

[3] A rectangular pyramid of base 40mm × 25mm and height 50mm is placed centrally on a cylindrical slab of diameter 80mm and thickness 30mm. Draw isometric view of the combination.

[4] A sphere of diameter 60mm rests on the frustum of a hexagonal pyramid base 60mm, top face 30mm side and height 80mm, such that their axes coincide. Draw isometric view of the combined solids. [Sketch book problem]

[5] **A rectangular pyramid of base 40mm × 25mm and height 50mm is placed centrally on a rectangular slab side 100mm × 60mm and thickness 20mm. drawisometric view of the combination. [Sketch book problem]**

[6] **A frustum of cone base diameter 50mm, top diameter 25mm and height 50mm is placed centrally on a cylindrical slab of diameter 100mm and thickness 30mm. Draw isometric view of the combination.**

[7] A sphere of diameter 60mm is placed centrally on the top face of a square prism side 60mm and height 70mm. Draw isometric view of the combination.

[8] A frustum of a square pyramid base side 40mm, top face side 20mm and height 40mm is placed centrally on frustum of a cone base diameter 80mm, top diameter 60mm and height 20mm. Draw isometric view of the combination. [Sketch book problem]
